World Patent Products

The coolbit cap for outdoor use, outdoor work, and drivers

 \rightleftharpoons We have obtained a patent for our new series of coolbit(TM) cooling Cap.

By using the accelerated Japan Patent examination system, we were able to receive patent registration approval in an astonishing only six months from the application date.

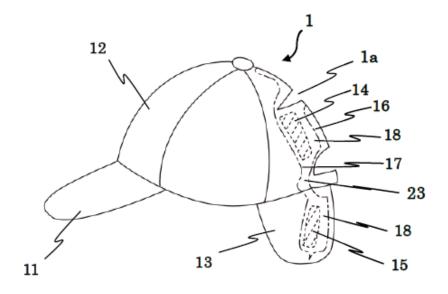

----->As a result, it is now possible to realize the globalization strategy that I will explain below.

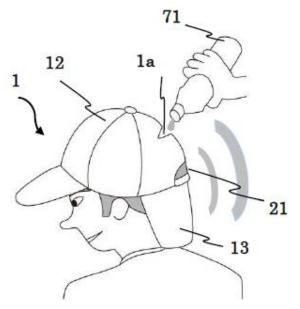

1. Outline of the new patent; Regist NO; JP7518321 (11, July. 2024)

Nowadays, you can get cold water from vending machines on any street corner. Just one mouthful (50ml) is poured into the water inlet at the top of the cap or hat, and the cooling sensation due to the heat of vaporization lasts for 2-3 hours, making it refreshing and ideal for preventing heatstroke in the summer! Given the recent trend of heat waves and extreme heat waves around the world, this is an exclusive patent that is attracting a lot of attention.

4. Schedule for globalization plan based on new patent

1) December 15, 2023: Filing a patent application and requesting examination in Japan

2) February 5, 2024: Received notification of the first examination results from the Japan Patent Office

Priority period: 12 months from application

4) **Around late August 2024**, Nichiyou Hatsumei Gallery Co., Ltd. (English name: KOBAYA Co., Ltd.) plans to file an international PCT application. (Within one year of priority application rights from the application date) PCT international application is over PCT/JP2024/24792

5) Prototype production and sample distribution to begin from July to October 2024 Orders to begin from November 2024, **full-scale sales to begin from spring/summer 2025**

Priority period: 30 months from application

6) Deadline for requesting international patent registration (The deadline for applications is within 30 months from the date of application in 157 countries of the World Patent Cooperation Treaty, so the deadline is **the end of April 2026**, and in some countries it is 20 months until June 2025)

5, Expectations for international license intermediary companies in the context of globalization strategy

Nichiyou Hatsumei Gallery Co Ltd

English Name; KOBAYA Co Ltd

Hub factories (Vietnam, etc.)
Supply of master products

coolbit ®

Provision of international patent license for cooling structure specifications

*We are also looking to act as an intermediary for Japanese international trading companies operating in the global textile and apparel market.

*Intermediation of international license contracts, production, and sales

Brands of hat manufacturers and sales companies in each country

Water injection cooling function cap added (licensed product)

Responding to the market for heat stress health measures in the future as global heatwaves continue to expand

Let's protect people around the world from heat stress caused by outdoor activities due to heat waves and extreme heat that are getting worse every year!

New Patent [coolbit win CAP]

- 1, Japan Patent; Applicatio 15.DEC, 2023
- 2, Jpana Patent Regist J P7518321 11.Jun.2024
- 3, World Patent(PCT) Appricatio PCT/JP2024/024792
 - 9.July.2024
- 4, World patent report from WIPO 6.Aug.2024
- Deadline for transition of international country registrations

 May.2026
- 6, Expiration date of this international patent Dec.2044
- License agreement for this international patent Role of production and sales operations
- ①Intermediary services for licensing agreements with hat manufacturers and sales companies around the world (by region)
- ②Import and export of this product from our hub factory in Vietnam and other countries (however, sales in Japan are not included)
- 3This project is also connected to the UN SDGs Goal 13, which aims to "take concrete measures to combat climate change caused by global warming," so we will be raising awareness of this issue.

6. Market Reserch

6-1 Top 10 countries selling caps (not hats, but baseball caps) (Research by ChatGPT, in addition to the ones listed below, we can also research hat manufacturers in the US, China, etc.)

Here are the top countries based on their overall ecommerce sales volumes in 2023:€

- 1.→**China**: With the largest ecommerce market, China is expected to generate over \$3 trillion in sales □ (<u>Oberlo</u>) □ .←
- 2.→ **United States**: The US follows with mearly \$1.2 trillion in ecommerce sales □ : (Oberlo) □ .←

- 6.→India: Expected ecommerce revenue is \$118.9 billion (Oberlo) . ←
- 7. **→ Germany**: With ecommerce sales of \$97.3 billion (Oberlo) . ←

- 7. Validity of this patent and market characteristics in various regions of the world Exclusive rights valid for 20 years from the date of patent application in Japan, until December 2044 It is expected to become the core of business development as a global strategic product in response to rising temperatures due to global climate change.
 - 7)-1 United States: Region where product development through intellectual property rights is most respected Central America: Mexico to South America, where product development for the sports market is advantageous
 - 7)-2 EU: Spain, Italy, Portugal and other southern high-temperature regions, and Germany are promising, but the maintenance fee for patent registration in the EU is relatively high It is possible to register patents separately within the EU, and it is also possible to appeal to global sports brands
 - 7)-3 China, South Korea: In some cases, intellectual property rights may not be effective, so utilizing domestic manufacturers is the key.
 - 7)-4 India: Potential for almost the same
 - 7)-5 Southeast Asia: Production base for the global market and a major sales market in the near future
 - 7)-6 From the Middle East to Africa: The Middle East for pilgrims, Africa to utilize UN SDGs support

8. Conditions for participating in the international patent license

- 8)-1 The joint applicant for the patent registration transfer to the country in question will be a company in the country in question, or an intermediary company for that company
- 8)-2 The company must be able to bear the full cost of the registration transfer and rights maintenance costs of the patent in the country in question
- 8)-3 The company must be able to pay us the initial license contract fee, production, and sales royalties based on the number of units sold, in line with the expected market size in the country in question
- 8)-4 In some cases, it may be possible to procure products from a hub factory in Vietnam to the country in question

Global warming may be unstoppable!

SDGs Goal 13: Take concrete measures against climate change! To the people of the world,
