

Global warming cannot be stopped!

Throw it away during the scorching heat of summer to prevent heat stress outdoors!

New Product!

World Patent

coolbit® W cool CAP

Japanese Patent Registration
World Patent PCT/JP2024/24792

A new cooling cap that cools the entire back of the head and the back of the neck at the same time

The cap has a water injection pocket at the top that can be filled with cold water from a plastic bottle! The evaporation effect of the special highly absorbent fiber inside keeps you cool for a long time!

Just inject 50ml of cold water at a time! The cooling water flows and penetrates all the way to the bottom of the flap!

Water filling pocket on top of the cap

You can stay cool anywhere, anytime!

Product name: coolbit Water in Cap

Product number: CBWCP-SLV

Price: quote required

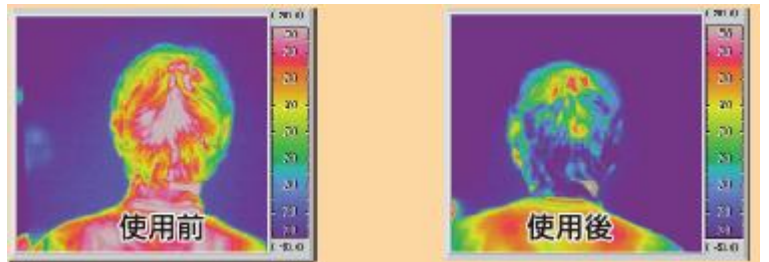

The cooling effect is obvious at a glance! 10°C or more!

100% silver vapor-deposited polyester that reflects sunlight

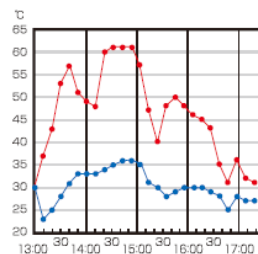

Waterflow from the back of the water filling cap to the flap

Cooling part seen from the back

Coolbit Water Injection Cap Cooling Effect Graph

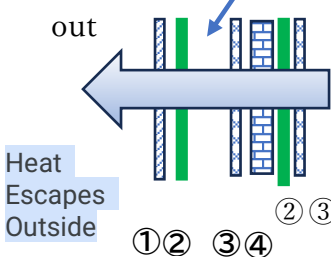

Even if the surface of the top of the hat reaches nearly 60° C outdoors in midsummer, the temperature of the underside of the cooling part remains at 30-35° C.

Red; Temp of the top of the cap
Blue; Temp of the back of cap and flap

Inject 50ml of cold water from a plastic bottle at a time, and the patented cooling structure allows the cold water to penetrate evenly, providing a cool feeling from the back of the head to the upper neck for 2-3 hours!
