

Beat global warming!

To help drivers beat the heat, the back of your head feels cool and refreshing !

A world-first new product

coolbit ® Water in CAP

A new cooling function cap that cools the entire back of the head !

JAPAN PAT Regist/DesignP.
World Patent (PCT) Pend

Inject water from a plastic bottle into the water injection pocket at the top of the cap (room temperature water is fine!) and get cool!

*When used in an air-conditioned car, the evaporative cooling effect will keep the back of the head cool by several degrees for a long time, rather than the surrounding body!

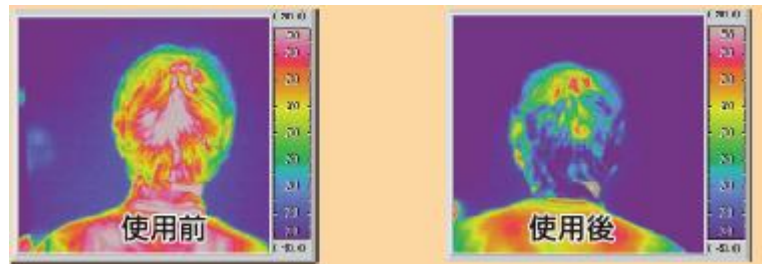

Just pour 50ml of water into the water inlet at the top of the cap!

Product name: coolbit water inlet cap

Product number: CBWCP-SLV

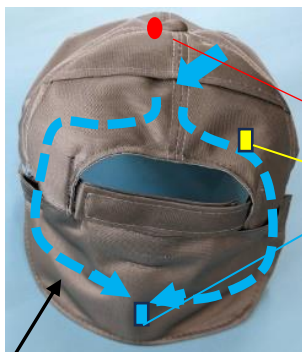

The cooling effect is obvious at a glance!
More than 10 °C!

100% silver-coated polyester that reflects sunlight

Cooling area of back

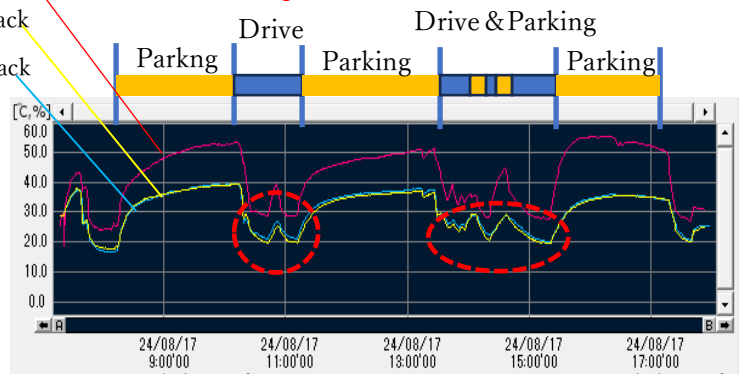

Internal water flow

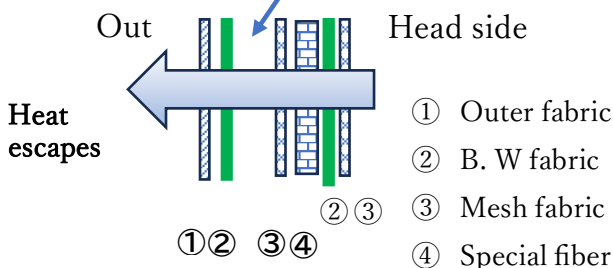

- Meas Point
- Top face
- Top Back
- Flap back

■ Cooling effect graph for coolbit water inlet cap

When you are driving a car and the air conditioning is on, the back of your head feels cold and is several degrees Celsius lower than the surrounding area.

■ Patent Structure Water injection space
